CLEVER STORAGE

CLEVER PLANNING GAINS YOU SPACE.

Plan your new dream kitchen from the inside out.
You'll gain space, ease-of-use and a beautifully coherent design.

The kitchen – the hub of your home.

Our lives, our lifestyles and the technology we use are in a state of constant change. This is especially the case with kitchens, which have once again become the heart of the home, a place where family and friends spend time together. In the recent past, kitchen design focused on functionality and efficiency; today the emphasis is more on creating a welcoming ambience, with the 'perfect' blend of aesthetics, emotion and functionality. To put it another way: the conviction that kitchens are for people is back – and also the feeling that your kitchen is a place to enjoy life.

HIGH CABINETS

On the way up. In today's kitchens, high cabinets are planned either as a block or as standalone units. Either way, the result is an elegant unit, and often that's where you'll find the technology focus and also the central food storage in the kitchen. » [Page 12](#)

BASE UNITS

To make intelligent use of the whole depth of an undercounter, or base, unit in the kitchen, you need a fitting that moves all the stored items out in front of the cabinet – to give you a clear view and easy access. » [Page 32](#)

CORNER UNITS

A corner unit is the ideal place to store pots and pans and other kitchen equipment. And development engineers have come up with a number of solutions in addition to the classic carousel fitting. » [Page 44](#)

WALL UNITS

Wall units play a special role in any kitchen, both because of their visual impact and from a practical point of view. They make tremendous demands – in terms of functionality and user-friendliness – on lifter and parallel lift systems. » [Page 54](#)

MIDWAY SOLUTIONS

Who wouldn't want to cook like an expert? A well-equipped, professionally organized kitchen is a step in the right direction. It should combine practicality with stylish design. » [Page 64](#)

TABLES

Form follows function. Kesseböhmer table concepts help kitchens to become even more efficient, more streamlined and, above all, easier to work in. They're adaptable and customizable. » [Page 72](#)

DESIGN AND QUALITY

Fine design has a positive effect – like sunshine or a friendly smile. It's motivational and adds joy to people's lives. » [Page 86](#)

Kesseböhmer gets your kitchen moving. As opposed to a static kitchen, a kitchen where fittings move will be better organized, and deliver a clearer overview, more pleasure, better use of space and better ergonomics. The focus in all Kesseböhmer's innovations and technical developments is always on you, our customers. We supply the products to make your dream kitchen a reality!

Overview

Minimalistic structural features and a lot of glass create a clear overview and promote tidy storage.

Ease of use

Controlled, coordinated movements mean that even heavily loaded kitchen units open and close effortlessly.

Ergonomics

Your kitchen is designed to suit you – and not the other way around!

Easy access

Everything in easy reach, because the entire contents are moved right out in front of the unit.

Design

Elegant, exclusive and award-winning.

Quality

Made in Germany. All the way from the idea to the finishing touches – in-house from Kesseböhmer.

THE ULTIMATE IN FORM AND FUNCTION.

The factors to consider in successful planning are the size of your kitchen, the layout and – most important – you! It's your wishes, your expectations and your needs that should determine the choice of fittings behind the fronts in your dream kitchen.

 KESSEBÖHMER

When you buy a car, you're offered a bewildering choice of features, colours and technical details. The individual choices you make transform your purchase from just another vehicle into your ideal car. Something similar applies to your kitchen. There are a huge number of choices open to you – use them so that you get exactly the kitchen you want!

Plan your kitchen from the inside out.

At the start of the planning process, most people already have some idea of the sort of kitchen they want.

Modern, traditional or country fronts, an open-plan design or a separate room? A breakfast bar or a table? A separate dining room? Or a more communicative, open-plan solution?

By contrast, very few people will have considered how efficient and user-friendly the kitchen should be – including topics such as distances between work areas, the whole question of ergonomics, and how important a role the fittings behind the fronts play in the way your kitchen works for you.

The days when you opened a cupboard door and saw only a couple of simple shelves are long past.

We would like you to be able to open every cupboard door in your new kitchen with a happy smile. Kesseböhmer offers you intelligent technology in quality fittings that enable you to get the most out of your storage space and to transform your kitchen into a wonderful place to be and work.

Qualities to look for in the fittings behind the fronts are perfect function, exclusive design and quality manufacturing.

We hope you enjoy browsing through this brochure – and that you find new ideas for planning your kitchen from the inside out.

Statisticians tell us that we're all getting taller – kitchen designers have reacted by raising the height of a standard worktop. But will this standard be a comfortable working height for you?

Why be ruled by the dictatorship of standard heights? Now there are intelligent systems that will let you change the worktop height to suit you – and at the touch of a button. These systems can also transform a sit-down eating area to a stand-up workplace, and vice versa.

”MY IDEAL WORKING HEIGHT IS 86 CM, BUT MY PARTNER IS HAPPIER WITH A WORKTOP HEIGHT OF 94 CM.

The critical measurement is the distance between your bent elbow and the worktop surface. And then there's the fact that you are probably not the only person working in your kitchen, so that standard heights begin to look like an unergonomic compromise.

And not just for you, but for each family member individually. Hobby chefs tend to invest a lot of money in expensive knives and high-performance kitchen appliances. But, in reality, the key factor in enjoying cooking is to be working at a height that is kind to your back. Adaptable workplace height guarantees just that. And they're ultra-family friendly – you can lower a table to make a comfortable child-sized workplace in moments.

HIGH CABINETS

On the way up. In today's kitchens, high cabinets are planned either as a block or as standalone units. Either way, the result is an elegant unit, and quite often that's where you'll find the technology focus and also the central food storage in the kitchen. » Page 12

A modern kitchen featuring dark wood-grain cabinets. Integrated into the cabinetry are a built-in oven, a cooktop, and a dishwasher. The appliances have black glass fronts with silver handles. The lighting is warm, highlighting the wood texture and the sleek design of the kitchen.

Aesthetics and functionality all along the line: **high cabinets.**

Today, high cabinets, often planned as a block, with appliances integrated at eye-level and storage space for groceries, have gained an important place in kitchen planning – and rightly so!

KESSEBÖHMER
CLEVER STORAGE

Make more of your kitchen. Kitchen blocks for cooking or preparing food are standard in contemporary kitchen planning; for instance, a block of high cabinets against at least one wall of the kitchen. This has visual and functional benefits.

can be. What they have in common is the belief that you shouldn't have to bend down to peer into a cupboard or fetch something out. Instead, the cupboard contents move out to meet you. You have a clear overview and easy access.

” THE PERFECT TEAM:
FRIDGE AND PULL-OUT
SIDE-BY-SIDE CREATE THE
ULTIMATE STORAGE CENTRE
IN A MODERN KITCHEN.

It's totally logical: you can fit more into a continuous block of tall cabinets than into separate wall and base units with the same footprint. Wherever space is at a premium, high cabinets will win hands down. The following pages will give you some idea of how versatile these solutions

Just one CONVOY can store a week's worth of groceries for a family of four. Positioned side-by-side, a CONVOY and your fridge will create the ultimate space- and time-saving storage centre in your kitchen.

The layout and functionality of your CONVOY will depend on what you want to store – from bulky cereal packages to compact jars and tins. Your CONVOY can be adapted exactly to your lifestyle and your requirements.

A HIGH CABINET NEED NOT TOUCH THE CEILING.

The bigger the kitchen, the more choice you have: blocks, counters, base units, wall units and taller cabinets. A highboard will always create a light and open look – it also opens up new options for using a wall in the kitchen.

A highboard needn't be tall to offer a range of options for the inside fittings. CONVOY moves the entire contents right out of the cabinet. What more would you want?

How much user-friendliness can you fit into a high cabinet? Kesseböhmer offers three variants of its CONVOY. Each variant brings the entire stored contents right out in front of the cabinet – for example, when you simply open the door. You can see everything at a glance – and it's all in easy reach. Specially engineered runners and opening systems “float” the contents of your cupboard out towards you – even if you’ve packed it full. World first CONVOY is fitted with both opening and closing damping as standard.

The height of each tray can be changed steplessly and independently. There's a wide choice of materials and colours. You also choose how many trays you want in total and you choose the tray design. In other words, to a critical extent, you customize your CONVOY to exactly suit your requirements.

”

ELEGANT, EXCLUSIVE AND AWARD-WINNING.
A WEEK'S GROCERIES FOR A FAMILY OF
FOUR FITS INTO JUST ONE CONVOY.

The image shows a close-up, high-angle view of a modern kitchen unit. A pull-out tray is extended, revealing several glass jars with black lids, some containing dried herbs or teas. The unit has a sleek, metallic finish. The lighting is dramatic, highlighting the textures and colors of the jars and the unit's design.

DESIGNED TO THE LAST DETAIL.

Kesseböhmer works with a number of quality partners to give kitchen manufacturers new options to create trays with exclusive functionality and design. Opening the unit is a “wow!” experience every time.

Ideal to give jars of herbs, teas and coffee pads a space of their own.

 KESSEBÖHMER

CONVOY customizing: special trays for very special purposes. Bespoke elements that combine innovative engineering and craftsmanship. You'll look a long way for more exclusive and individual fittings for your kitchen units.

And the new ideas and designs for CONVOY trays just keep evolving – like apps for smartphones.

It's not just about function; looks are seriously important. Exclusive materials,

like beautiful wood, stainless steel and aluminium take your kitchen cupboards into the realm of luxury.

Take time to browse some of the almost endless possibilities.

High cabinets are storage solutions par excellence. But more important than how much you can cram into them is how quickly and easily you can fetch out whatever you need. It all started with the DISPENSA larder unit, which opened up new vistas in kitchen planning.

DISPENSA. Here's to larder units!

Kesseböhmer's DISPENSA larder pull-outs are true classics. Developed specifically as slimmer storage units, millions of DISPENSAs have since been installed. All it takes is a gentle pull and the fitting plus contents glides right out in front of the cabinet. It's easy to fetch out whatever you want, or to check the contents and labels at a glance, because storage is shelf-oriented.

It's easy to change the height of individual trays and baskets, which are available in several strikingly attractive styles. Designed to match and enhance your chosen kitchen style.

The see-through sides, featuring an exclusive, contemporary look, are designed to give you an optimal view. The DISPENSA has been engineered to make maximum use of the full width and depth of the cabinet.

DISPENSA is the highest selling larder pull-out fitting in the world. It's quality "Made in Germany". And when it comes to smooth action, reliability and durability, DISPENSA pull-outs are unsurpassed.

”

HUGE STORAGE CAPACITY,
EASY TO ORGANIZE AND A
CLEAR OVERVIEW. DISPENSA!

Kesseböhmer sets the highest criteria

for the mechanical systems in your fittings. We want to create your “noiseless kitchen”, for example, with unsurpassed smooth runner action and opening and closing damping. Kesseböhmer also sets the highest standards for the surface quality of its products. Chrome-plating and all other surface treatments are carried out in-house under our rigorous quality controls. The same applies to all the other work processes – from development through to shipment. With all manufacturing steps in-house, Kesseböhmer can react fast and flexibly to new kitchen trends and keep pace with market developments.

eTouch[®]

eTouch: Electric opening for handleless front panels. It couldn't be easier. Press once gently on the front – and the pull-out glides open.

The DISPENSA larder pull-out is ideal for tall, narrow units. If you want a tall storage unit 45 cm wide or wider, we recommend our CONVOY Lavido for the maximum overview and very easy access.

DISPENSA Swing offers you an extra feature – once pulled out, the entire pull-out can be swung effortlessly 90° to the right or left. You can pick out whatever you want easily from either side.

DISPENSA – a “must have” for many kitchen planners. Kesseböhmer offers a number of DISPENSA variants that give kitchen planners wide scope as regards cabinet width and height. So that a DISPENSA can be integrated in just about any kitchen.

“EVERYTHING IS DESIGNED TO MAKE YOUR NEW KITCHEN AN EASY PLACE TO WORK AND A DELIGHTFUL PLACE TO BE.

People who love to cook generally have a lot of ingredients to store. So it makes sense to choose storage solutions that were developed in line with the latest advances and know-how.

For example DepotLine. Practical and decorative storage containers made of high quality transparent polymer make it fun to be well organized. The streamlined, contemporary design looks great; the transparent containers make it easy to find what you're looking for and check full levels.

Split storage can offer twice the usability. TANDEM, also from Kesseböhmer, offers a different approach to the challenge of making best use of the storage capacity in a high cabinet.

” IN FACT, WE HAVE DESIGNED A PULL-OUT THAT UTILIZES THE IDEAS OF SET THEORY – BY GROUPING OBJECTS INTO CLEARLY DEFINED SETS YOU GET A CLEAR OVERVIEW AND EASY HANDLING.

As the cupboard opens, the contents divide into two sections. One section moves with the door out in front of the cabinet. At the same time, the rear section is automatically drawn forward.

The result is fascinating and highly practical. You have a clear view of all your stored groceries, right in front of you in two easily accessible sections.

This solution works especially well if you plan to install two TANDEM units side by side as a complete storage depot. Your stock of groceries is accessible from the equivalent of four front widths. But you've only had to open two doors.

All the options are open. Which storage system you finally decide on will depend on several factors: the floorplan of your kitchen, the way you like to live, cook and eat – in fact your individual lifestyle! Your kitchen planner will work with you to find the ideal solution. CONVOY, DISPENSA and TANDEM can even be combined in a kitchen layout.

Optimizing storage under the worktop: base units.

Base units, also known as undercounter units, form the solid basis of your new dream kitchen. The wide range of purpose-designed fittings for base units let you choose storage options to suit the way you live and how you use your kitchen.

KESSEBÖHMER
CLEVER STORAGE

Perfect – and not just for gaps: today, 15-cm pull-out fittings offer so many practical, purpose-designed storage options that people are choosing them as separate options, not simply as gap-fillers.

With the right fitting, narrow gaps can provide a surprising amount of storage space and functionality. The towel rail, and the baking tray and tray rack offer practical, individual choices for fitting out narrow base units.

In a lot of kitchens, valuable storage space goes unused. Why not turn this space into useful storage, for example, with one of Kesseböhmer's 15-cm base unit pull-outs. Installed near the hob, it's the ideal place to store herbs and spices. There's always space for good ideas!

”

A 15-CM PULL-OUT TRANSFORMS EVEN NARROW GAPS INTO PRACTICAL STORAGE.

Customize your cookingAGENT with your choice of different elements. General-purpose or special-purpose: fit out a cookingAGENT as a “coffee” pull-out, or a “breakfast” specialist, or pack it with spices, oils and vinegars and your favourite cooking knives.

Introducing your cookingAGENT.

The simplest ideas are often the best! Kesseböhmer's cookingAGENT breaks with conventional concepts for kitchen organisation. Stop and think for a moment how many cupboards you open to set the table for Sunday breakfast – cutlery, plates and bowls, cereals, honey, jam ... Your cookingAGENT could put an end to that. You could store everything you need for the breakfast table in just one pull-out. Just one door to open!

Or you could fit out a cookingAGENT with tools, utensils and ingredients for cooking a meal: knives and chopping board, spatulas and tongs, oils and vinegars, spices and sauces – all the things you use regularly.

Organisation is the key. UV radiation damages the flavour of fine oils and vinegars. So they should be stored in a cool, dark place. Because you'll be using them often, a storage unit close to the hob is ideal. So much the better if you can store spices and herbs, sauces and cooking utensils in the same place.

”

THE DIFFERENCE BETWEEN GOOD PLANNING AND PERFECT PLANNING QUICKLY SHOWS UP IN DAILY USE.

The spice rack is sized to take the popular Emsa spice boxes, which can be supplied with the rack or as a later upgrade. A set of Emsa spice boxes consists of six transparent boxes with labelled lids. Up to three sets (18 individual boxes) will fit exactly into the new spice rack. Alternatively, other spice jars and containers on the market will fit into the spice rack, so that you have a good view and easy access.

Because a COMFORT II has a small footprint, it's an ideal storage solution, especially for small kitchens. You'll be amazed at the huge range of vinegars, oils and spices that you can store in a purpose-built pull-out.

COMFORT II from Kesseböhmer.

The special spice rack is simply dropped into the fitting from above. It's purpose-designed for storing herbs and spices efficiently and in easy reach. The spice rack makes better use of the space above the other storage trays, holding even a large collection of spice jars without blocking your view of the lower trays.

A pull-out kitchen cabinet is shown, revealing two rows of spice jars. The top row features jars with green lids, and the bottom row has jars with black lids. Below the jars, a shelf holds various cooking oils and sauces, including bottles of olive oil, vinegar, and hot sauce. The cabinet is white and has a silver handle. The background is a plain white wall.

The dream of every passionate cook: All your oils and sauces and essential spices stored in one compact pull-out for quick and easy access. When you've finished cooking, it all disappears again into one small, neat under-counter unit.

Your kitchen, the central cleaning facility for your home.

Why keep your home clean? So that it looks good? So that it feels comfortable? More than that, it's a question of hygiene and proactively caring for your family's health.

Because cleaning is going to be a regular job, there's every reason to make it as easy and pleasant as possible. Having the right equipment is a good start – and one thing to consider is how to store your cleaning stuff, which might be in your undersink cupboard.

The tidier and more systematic your storage, the faster you'll be able to put your hand on the cleaning equipment you need.

Wherever you're cleaning, if you can pick up a carrier with all the materials and tools you need and take it to your work area, cleaning will immediately be easier and you'll work faster.

Kesseböhmer offers you a cleaning assistant, which you can stock individually. It's available round the clock and when you don't need it, it stows away in less than half a square meter.

”

YOUR KITCHEN IS THE HEART OF YOUR HOME. NOT ONLY BECAUSE YOU AND YOUR FAMILY AND FRIENDS GET TOGETHER HERE TO EAT, TALK AND WORK, BUT ALSO BECAUSE IT'S A CENTRE FOR CLEANLINESS FOR YOUR HOME.

Your personal cleaningAGENT is a pull-out fitting especially developed for storing cleaning materials and tools. Portable baskets make this a cleaning system that goes with you wherever you're working. The cleaningAGENT is often integrated in the cupboard under the kitchen sink. Open the door and you have all the bottles, tubes, brushes and sponges you need – well-organized and easy to access.

The portable baskets can be simply lifted out, so that your cleaning centre goes with you around the house. Whether you're cleaning windows or the bathroom, the task will go faster if you have everything along right where you need it. And afterwards, everything fits neatly back into the cleaningAGENT – ready for next time.

” **YOUR cleaningAGENT: HELPFUL, STURDY AND CUSTOMIZABLE!**

cleaningAGENT trays and baskets are designed to be customized; you select and arrange them to suit your requirements. Movable dividers adapt the space for your choice of cleaning materials. And the tough plastic trays can themselves be kept clean by running them occasionally through the dishwasher.

How kitchen planners learned to love corners.

Corner units have gained a firm place in the kitchen planner's toolbox. Carousel systems are ideal for storing pots, pans and mixers. Some attractive new systems have been developed as alternatives to the classic storage carousel.

KESSEBÖHMER
CLEVER STORAGE

reddot design award

One outstanding example is Kesseböhmer's LeMans.
It's a perfect blend of technology and design that you're
sure to enjoy using.

LeMans. Almost too good for pots and pans.

Originally developed as conventional storage for pots and pans, LeMans is being successfully used for other applications, thanks to its striking looks and fascinating technology.

LeMans trays swing separately and completely out of the corner cabinet in a smooth and elegant movement. You have a clear overview of and easy access to everything in your LeMans. It's highly practical if you're storing pots and pans, especially since you can change the tray height for optimal storage. But: a LeMans can do much more!

LeMans trays move independently of each other. If you choose the optional damped self-closing, you'll enjoy using your LeMans even more, especially if you're in a hurry. And you won't hear a sound!

The trays can be supplied with an anti-slip coating or fitted with anti-slip mats. The sturdy edging is seamlessly joined to the bottom panel, for a strikingly elegant look.

Winner of a Red Dot Award for outstanding design. Quality that sets standards.

The following layouts illustrate some of the versatile options for using LeMans and how its elegant optics harmonize with very different kitchen styles. One interesting new application for LeMans is to make clever use of taller corner units in an eye-catching kitchen design.

What a pity that most kitchens only have four corners! Here's an impressive use for our attractive corner units – in a corner highboard for storing plateware, glasses and more. Or simply pots and pans.

A LeMans tray makes everything on it look special. Even with the maximum load – 25 kg per tray – the elegant opening movement can be initiated by pulling with just one finger. Closing is soft and silent, thanks to the self-closing feature which activates automatically at an opening/closing angle of 60°.

This means that even your expensive glassware and best porcelain dinner service are safe in a LeMans. Perhaps you've already decided exactly where a LeMans will fit into your kitchen.

BRILLIANT SOLUTION FOR CORNERS.

LeMans revolutionized corner unit design by making it possible to move all the contents of a corner unit right out in front of the cabinet for easy access. The unsurpassed harmonious movement makes using a LeMans a memorable experience.

 KESSEBÖHMER

MagicCorner is another corner solution that gets more out of any corner cupboard. Opening just one door, initiates a fascinating series of movements and gives you access to what is in effect the contents of two cupboards.

« The magic effect: MagicCorner.

Opening the door swings the contents of the nearer cabinet out in front of the cabinet and to the side; simultaneously the contents of the back section are drawn forward into easy reach.

» This round peg fits the square hole.

And it's proved its value many thousand times. The carousel in the corner unit: REVO from Kesseböhmer. The secret of its success lies in the clever door system.

” MAKING PRACTICAL USE OF CORNER SPACES CALLS FOR CREATIVITY AND MATURE TECHNOLOGY THAT EXERTS AN ENDURING FASCINATION.

This means you can pack your corner storage full, knowing that you'll have easy access to everything you've stored. You can make more practical use of corner space. And be enchanted by this idea – every day!

One gentle pull, the REVO turns, and all the stored pots, pans and kitchen appliances glide into view – absolutely quietly and smoothly. You choose where the REVO stops so that you can fetch out what you want. The height of each tray can be adjusted and changed individually. And Kesseböhmer designed a special pan shelf for those awkwardly shaped frying pans. Finally, when the REVO has come full circle, the doors close again automatically, quietly and gently.

Designed to move! **FREElift.**

Lifters are the fittings that swing, lift and fold the front panels of wall units upwards and back down again.

KESSEBÖHMER
CLEVER STORAGE

”

A FLOWING AND HARMONIOUS
SYMPHONY OF ELEGANCE,
FUNCTIONALITY AND POWER.

The **FREElift** family – from Kesseböhmer!

Lifters are the fittings that raise and lower the fronts of wall units and the fronts that conceal appliances, such as microwaves, integrated in tall cabinets. Kesseböhmer offers a complete family of lifters that together cover all the potential lifter applications in your home.

Lifters not only add to the user-friendliness of contemporary built-in kitchens, they are also increasingly used in bathroom cupboards and in standalone units.

A striking feature of all Kesseböhmer lifters is their extremely compact design. They are also outstandingly reliable, with smooth quiet action and a streamlined, low-profile design that harmonizes perfectly with the minimalist style of modern kitchens.

The main benefit is to eliminate the risk of bumping your head on an open cupboard door. You have optimal access to the contents of your wall units and thanks to MPS (Multi-Position-STOPP) you can open the front to any angle and it will stop in this position reliably and safely.

Lifters are to be found in all sorts of applications. Practical and innovative in kitchens, they are now making life easier in offices, bathrooms and even bedrooms.

The growing popularity of lifters is due to a combination of easy access and improved safety. Lifters move the fronts upward, out of the way of kitchen users. Kesseböhmer also offers the option of an electric drive (eTouch) to perform the lift operation automatically in response to the lightest touch.

Lift, lower and fold: The choice of lifter technology is partly determined by the height of the wall unit and the free space between the top of the wall unit and the ceiling of the room. Kesseböhmer offers the ideal FREElift lifter for every situation.

The FREEfold, for example, folds front panels as it lifts them – it's ideal for low-ceilinged kitchens. The FREESlide raises and lowers the front parallel to the cabinet – for example, for microwave units.

Which FREElift fittings will be used for which applications is a decision for your kitchen planner as you discuss your kitchen layout.

Give your kitchen a multi-faceted highlight:
CLIMBER with exclusive glass slats.

A very special feature! Shimmering glass and glamorous movements: the CLIMBER is a genuine highlight in any kitchen. It makes a feature of the simple act of opening a cupboard. A light touch underneath the carcass is enough to start the shimmering front splitting into slats that glide upwards in sequence to form a block at the top. It's automatic, electric and silent. You can also create a very special effect by lighting up the interior of the cabinet. LED lighting offers you a whole range of possibilities.

A choice of four glass colours ensures that the CLIMBER will look brilliant in your individual kitchen. Elegant black (translucent), classic white, frosted, or magnolia – with a delicate hint of colour.

CLIMBERs are ideal for creating special focus areas in your kitchen.

Designed to the last detail: **rail systems.**

A kitchen is always going to be a workplace.
Many small details make it perfect – in form and function!

KESSEBÖHMER
CLEVER STORAGE

LINERO MosaiQ: practical and beautiful. This rail system for the splashback area emphasizes the contemporary look of your kitchen and adds significantly to its general usability.

How practical can you get? **LINERO MosaiQ.**

The area between the worktop and the wall units is the ideal place to keep items you use often. Stored in a well-designed rail system, they also look decorative and they're easy to reach from the main cooking area. With LINERO MosaiQ, Kesseböhmer offers an attractive modular system for a wide range of applications.

LINERO MosaiQ combines striking contemporary design with total practicality. It opens up new vistas for eye-catching kitchen designs. The LINERO MosaiQ modules fit perfectly – in style, colour and materials – with the clear lines of contemporary kitchen architecture.

As a modular system, LINERO MosaiQ generates any number of alternative applications. Modules include universal shelves – you could use them to put down an iPad or a cookbook – containers for kitchen implements, hook strips, a rail to

hang a tea towel or a cooking ladle, a twin roll holder with a patented tear-off system, a paper roll holder, a memoboard and a magnetic knife block.

The modular system can be altered and adapted again and again in response to changing situations and requirements. And you can swap individual modules around easily.

The patented tear-off system lets you tear off a length of aluminium foil or cling film easily with one hand.

**THE ULTIMATE
IN FORM AND FUNCTION.**

In a contemporary kitchen without wall units,
LINERO MosaiQ adds character and style.

 **KESSEBÖHMER**

No-drill fixing: The basic LINERO MosaiQ rail is screwed on to a wall, alternatively it can be glued firmly to smooth surfaces using PowerMaxx adhesive. Glass splashbacks are a good example, but the rail can also be glued to other smooth surfaces – tiles, wood, laminates, metal and many plastics.

The multifunctional rail looks strikingly modern; it emphasizes the horizontal and makes a clear connection between the worksurface and the line of the wall units. Optional LED lighting emphasizes the effect. The system makes a clear and harmonious visual impact; it can only enhance a contemporary kitchen layout.

As a place for your favourite knife, for spices, cooking oils, notelets, kitchen paper rolls or even a mini herb garden, LINERO MosaiQ makes it easier than ever to use the space between the worktop and the wall unit in a practical way and at the same time to add striking visual impact to your kitchen. Choose materials that will create a perfect harmony with the style of your kitchen fronts.

”

THE NAME SUMS IT UP – MIX AND MATCH
THE NEW ELEMENTS LIKE MOSAIC STONES
ON THE ELEGANT RAIL.

A woman with blonde hair, wearing a blue button-down shirt, white jeans, and tan boots, is smiling and holding a white plate. She stands in a modern kitchen with dark wood cabinetry and a white countertop. To her left, a white cabinet door is open, revealing two glass shelves. The top shelf holds two beige ceramic vases and a small green plant. The bottom shelf holds a stack of white bowls and plates. The kitchen floor is dark wood. The background shows a sink area with a modern faucet and a window with a wooden frame.

Form follows function: tables.

Our adaptable table concepts make kitchens even more efficient, more streamlined and, above all, easier to work in. Good working conditions are highly individual.

➤ **The ergoAGENT twin** is a pneumatic system, engineered especially for the kitchen, which lets users change the height of tables and worktops smoothly and easily. The dining table, integrated in the kitchen architecture, can be transformed into a comfortable standing workplace – and vice versa. No compromises; instead unlimited flexibility.

◀ **ergoAGENT base** was developed to make island blocks in modern kitchens more ergonomic and variable. With ergoAGENT base you can vary the height of the island with minimal effort and great precision. You can raise or lower the island to suit your preferred working height and then, when guests arrive, you can transform it into an inviting buffet and bar counter at standing height.

ergoAGENT mono makes it easy to integrate a preparation area, eating area or workplaces even in a small kitchen, so that they take up as little space as possible. This means that people can use a very small space for a succession of different functions, always working at a height that suits their personal needs and working style.

The pneumatic centre post stands for reliable functionality and ample space for your legs. The connecting beam connects the ergoAGENT mono to the wall, so that it stands firm at any height. Operation is ultra-easy. Pulling a lever activates the ergoAGENT mono to glide up or down to the required height. It takes only a matter of seconds to adjust the height of an ergoAGENT mono so that any family member can sit comfortably and work standing or sitting at an ergonomically ideal height.

Having a small kitchen is no reason to do without an adequate and practical table. Kesseböhmer offers several space-saving solutions for this problem.

The photos right and below show Kesseböhmer's TopFlex – a table that is integrated behind a kitchen front and simply pulled out as the need arises. After use it slides back out of sight. »

No space for a table in your kitchen? Think again! When not in use, Kesseböhmer's TopFlex slides back into a base unit, taking up no more space than an ordinary cutlery drawer.

Small kitchens in particular profit from intelligent fittings behind the fronts. Because it's not merely a question of storing as much as possible, but also of maximizing the usability of cupboard contents.

Small kitchens need big ideas!

Clever and careful planning is probably more important for 10 square metres than for 30! Because every square centimetre has to be used to best advantage.

With Kesseböhmer fittings inside the cabinets help you make the best use of the available space and also deliver style and functionality.

If your kitchen area seems too small to realise all your dreams and ideas, then it's time to look at ways of using the space more effectively. For example, just one CONVOY pull-out can hold a week's groceries for a family of four.

In narrow kitchens, narrow base units can make the space look wider. Even 15-cm units can be fully utilized because their entire contents can be pulled out at a touch in front of the cabinet.

Small kitchens are often short of work surfaces and places to put things. All your kitchen equipment and cooking ingredients have to fit into the cupboards. That's why it's essential in a small kitchen that the cabinets are fitted out to suit your needs and not the other way round. With COMFORT II and the AGENT series you can create kitchen units that you can customize to meet your needs.

If your kitchen is on the small side, you need to plan the layout and the fittings behind the fronts especially carefully to get the most practical use later on.

There's never going to be a universal – one plan fits all – solution.

But it's absolutely possible to create your dream kitchen even in a small room. Before you start planning, write down a priority list.

” FOR EXAMPLE, DO YOU COOK ALONE OR WITH OTHER PEOPLE? DO YOU HAVE A LOT OF GUESTS, SO THAT YOU NEED SPACE FOR SERVING? DO YOU SHOP EVERY DAY, OR ONCE A WEEK?

A small kitchen brilliantly planned! The different heights of the cabinets open the way to different fittings and uses. At the same time, they separate the kitchen into different working zones.

High cabinets create a huge amount of storage space, because they can use the whole height of the kitchen. CONVOY is the optimal way to make optimal use of this extra upward space.

Corner fittings make sure that you are using every corner of even the smallest kitchen – there are corner fittings for high cabinets too.

Base units are often planned as purpose-specific storage. Kesseböhmer's AGENT range of fittings offer you a lot of choices.

TopFlex offers you a full value workplace which, when not in use, tucks away into the space of a shallow drawer.

Use the walls for storage. Small kitchens are almost always planned as classic closed kitchens. And this has advantages. You can use the available wall space, for example, by choosing a rail system like LINERO MosaiQ.

If you choose the right pull-out fittings, you can create an amazing amount of usable storage space behind the fronts. Kesseböhmer offers fittings for specific storage tasks, such as plateware and dishes, glasses, pots, pans and lids, as well as groceries.

The more precisely you define what you want before you start planning, the better your kitchen will live up to your expectations. It will be your dream kitchen!

Fine design behind the fronts.

More and more people see the kitchen as the central living area for the whole family. All the more reason to opt for intelligent systems and a coherent design behind the fronts as well. In focus: Form and function team up perfectly here.

KESSEBÖHMER
CLEVER STORAGE

There probably isn't another room in our homes that we devote so much time and effort to planning as the kitchen. And for good reason, because we expect such a lot from our kitchens, for instance that form and function harmonize perfectly.

We expect all the elements to be both functional and attractive. And to play a role in making the kitchen the perfect place to spend time – both working and relaxing. More than that, We want to enjoy cooking and kitchen work – just as much as eating and relaxing.

” FINE DESIGN HAS A POSITIVE EFFECT – LIKE SUNSHINE OR A FRIENDLY SMILE. IT'S MOTIVATIONAL AND ADDS JOY TO PEOPLE'S LIVES.

All this means that the design of your new kitchen is going to play an important role – from the style of the fronts and the worktop to the material for the sink and the splashback, and naturally including lighting and handles. The choices you make will affect the usability and the looks of your kitchen. You also need to give some thought to the fittings behind the fronts. A clever corner solution or opting for a larger unit fitting can give you much more usability compared with just a simple kitchen unit. It will also add to the overall value of your kitchen. It's worth remembering that Kesseböhmer products have won a number of international design awards.

High-calibre design, high-precision manufacturing.

The finer the design, the more important the production quality.
Perfectly finished surfaces, the harmony of shapes and materials,
and functionality that proves its worth day by day!

Kesseböhmer fittings continue the streamlined look of contemporary built-in kitchens, making sure that the fittings behind the fronts harmonize with the rest.

It's quality "Made in Germany". From exclusive product design to high-precision manufacturing. You'll recognize it at a glance – and you'll enjoy it every day as long as your kitchen lasts.

Specialists behind the fronts!

A cupboard is rarely just a cupboard – certainly not in the kitchen! Fittings specifically designed to match the contents are the ideal solution. There are content-specific fittings designed for storing pots and pans, glasses and plates, cutlery and naturally groceries! Here is a short overview of all the Kesseböhmer products and their features to help your planning.

CONVOY Centro

The 2nd generation of larder units! One gentle pull and the fitting plus contents glides right out in front of the cabinet. for cabinets up to 45 cm wide Elegant trays are designed for reliable storage and a clear view. » **High cabinets**

CONVOY Lavidio

Free access to contents from three sides and steplessly height-adjustable trays. The ideal pull-out behind sliding or hinged doors. Perfect storage for everyday use. » **High cabinets**

CONVOY Premio

The ultimate in fittings for tall cabinets. Striking design combined with brilliant engineering for easy access from three sides and a clear overview. » **High cabinets**

DISPENSA

The classic larder pull-out for tall, narrow kitchen units. Maximizes the storage space for a small footprint. See and access contents from two sides. » **High cabinets**

DISPENSA swing

The larder unit that glides out and swings aside, by 90° to the right or left giving you a clear view and easy access to the contents. » **High cabinets**

TANDEM

Two cupboards behind a single door. TANDEM splits cupboard contents into two easily accessible sections. The front section pulls out with the door, the rear section is automatically moved forward. » **High cabinets**

TANDEM depot

An impressive storage centre – just opening the doors is an experience. Twin TANDEM fittings prove again that the whole is more than the sum of its parts. » [High cabinets](#)

TANDEM coffee

The perfect special-purpose pull-out. Compact, with a clear view and easy access, it holds everything you need to serve the perfect cup of coffee. » [High cabinets](#)

No. 15

Opens up new options for kitchen planning. Only 15 cm wide, it offers all the ease of use and individual flexibility of a far bigger fitting – there are variants to store baking trays, spices and kitchen towels. » [Base units](#)

COMFORT II

The starting point for ultra-efficient organization and easy access under the worktop. The attractive, full-extension pull-out lets you see the contents at a glance and fetch out what you want from the side and from above. » [Base units](#)

cookingAGENT

Your very own kitchen helper: knives, cooking implements, sauces, spices – everything that you use frequently – is ready to hand in your cookingAGENT. Customized storage at its best. » [Base units](#)

cleaningAGENT

Your cleaning kit for the whole house. All your cleaning essentials, neatly stowed in one pull-out. Always ready to pick up and take along. » [Base units](#)

Specialists behind the fronts!

A cupboard is rarely just a cupboard – certainly not in the kitchen! Inside fittings specifically designed to match the contents are the ideal solution. Content-specific fittings are available for storing pots and pans, glasses and plates, cutlery and naturally groceries!

A carefully stocked and well-organized grocery cupboard is the best recipe for successful cooking and for people who enjoy good food.

Base units

No. 15, COMFORT II, cookingAGENT, cleaningAGENT

LeMans

A fascinating corner unit fitting with trays that can be swung out individually and completely in a bewitching movement sequence. Winner of a Red Dot Award.

» **Corner units**

MagicCorner

A duplex fitting for two-cupboard's worth of storage behind a single door. A practical and effective way to use corner space. Fascinating action and ultra-reliable technology. » **Corner units**

REVO

The classic corner solution. Ideal for pots and pans, and other cooking utensils. Easy access with the rotating carousel.

» **Corner units**

FREEflap

High-performance power pack capable of lifting even very heavy fronts with effortless ease. Compact design, smooth silent action.

» **Lifters**

FREEfold

Lifter system for fronts that fold in the middle as they lift. Smooth coherent movement sequence that lets you use the whole height of the kitchen.

Ideal, eg, for low ceilings. » **Lifters**

FREEswing

As it opens, the front swings up above the wall unit. Ideal for high-ceilinged kitchens with space to spare above the wall units. An elegant solution that eliminates the risk of collisions between people's heads and open cupboard doors. » **Lifters**

FREEslide

These lifters raise the front parallel to the cabinet. The perfect solution for stacked wall units and for built-in appliances such as microwaves in tall cabinets. » **Lifters**

CLIMBER

Pure fascination. At the touch of a button, strikingly attractive glass slats lift and fold into a neat package. Winner of a Red Dot Award for good design. » **Lifters**

LINERO MosaiQ

Blends practicality with fine design. The innovative LINERO MosaiQ rail system offers the most attractive options for making intelligent use of the space between the worktop and the wall units. » **Midway solutions**

ergoAGENT mono/twin

Worktop for preparation, table for enjoying, bistro-height table for parties. Change the height of your kitchen workplace to suit everyone who uses it – and every situation – quickly and easily. » **Tables**

ergoAGENT base

Better ergonomics and more functionality for your kitchen island. ergoAGENT base lifts and lowers the complete block of base units + worktop so that you're always working at your ideal height. » **Tables**

TopFlex

The solution when your kitchen seems too small for a table. Think again! With TopFlex, a neat dining or working table stows away into the space of a drawer. » **Tables**

Specialists behind the fronts!

In-cabinet storage solutions from Kesseböhmer make sure that everything in your kitchen is perfectly stored and that it's easy for you to find and retrieve the items you want.

The perfect blend of brilliant style and practical design, they're sure to save you space and time.
